

V.D. TEMPERATURE REGULATION AND ITS ALTERATIONS

	<u>Page</u>
D.a. VARIATIONS IN BODY CORE TEMPERATURE	VD-1
Figure VD-1. Body Temperatures Under Different Conditions	
Path VD-1. Fundamental Mechanisms of Temperature Regulation	
Critical Path VD-2. Mechanisms of Heat Loss	
Figure VD-2. Arteriovenous Shunt, Precapillary Sphincter & Heat Loss Through the Skin	VD-2
Critical Path VD-3. Mechanisms of Heat Gain	
D.b. INCREASED BODY TEMPERATURE (HYPERTHERMIA)	VD-3
D.b.A. FEVER	
D.b.A.a. PURPOSE	
Critical Path VD-4. Pathophysiological Purpose of Fever	
D.b.A.b. ETIOLOGY	
Critical Path VD-5. Etiology of Fever	
D.b.A.c. MANIFESTATIONS	
Critical Path VD-6. Path from Interleukin-1 & Other Products of Infection to the Common Manifestations of Pyrexia	VD-4
Path VD-7. Path of the Defervescence Phase	
Path VD-8. Pathophysiology of Fever as a Result of Dehydration	VD-5
D.b.B. HYPERTHERMIA	
D.b.B.a. HEAT SYNCOPE	
Path VD-9. Pathophysiology of Heat Syncope	
D.b.B.b. HEAT CRAMPS	
Path VD-10. The Pathophysiology of Heat Cramps	
D.b.B.c. HEAT EXHAUSTION	VD-6
Path VD-12. Pathophysiology of Heat Exhaustion	
D.b.B.d. HEATSTROKE	
Path VD-11. The Pathophysiology of Heatstroke	
D.b.B.e. MALIGNANT HYPERTHERMIA	VD-7
Path VD-13. The Pathophysiology of Malignant Hyperthermia	
D.c DECREASED BODY TEMPERATURE (HYPOTHERMIA)	
Path VD-14. The Pathophysiology of Hypothermia
